

Bed Bug Conventional Treatment

1. Remove all clothing, boxes, shoes, and debris from floors. Boxes should be discarded.
2. Move furniture at least 3 feet away from walls.
3. Vacuum all areas.
4. Wash and dry (on high heat) all clothing, towels, linens, throw rugs and bedding. Place cleaned items in plastic bags directly from dryer and tie securely.
5. Every job is unique – the technician servicing will give further instruction after the initial treatment, which will be based on activity level and amount of personal items in the household.
6. If discarding any infected beds, furniture or electronics, **PLEASE damage or destroy after first treatment.** Do not move items throughout the home prior to treatments. This will only cause the bed bugs to spread to other areas.
7. Declutter home
8. Do not remove anything from the home that you plan on bringing back in. All items must remain for duration of treatments. Do not store items in your car or garage.
9. Do not bring any used furniture into the home.
10. Must vacate household for 4 hours after treatment has been completed.
